Tornado Preparedness – 60 sec.

When a tornado watch is issued, keep an eye on the sky. There are times you won't hear a warning, so watch for tornado warning signs. Before a tornado hits, the wind may die down and the air may become very still. A tornado can be invisible in a dark or greenish sky, a wall cloud, large hail, or a cloud of dust or debris. It's also for a tornado to be quite visible. Tornadoes often occur in the leading or tail end of a storm when the skies seem blue and safe. Don't assume you're safe just because the rain has stopped. Now is the time for you to practice you family shelter plan, prepare your emergency supply and food kit, and plan how your family will stay in touch if you're separated. Be a good neighbor and make sure others in your community are prepared. And don't forget your pets. Go to ReadyWisconsin.wi.gov to learn more about getting a kit, making a plan and staying informed.
